

Delivering the enterprise flexibility you need to drive IT innovation and data centre transformation without compromising day-to-day mission critical operations.

TeraMach's Cloudx™ enables our clients to consume cloud services through multiple cloud providers with transparency, agility and reliable private network connectivity. TeraMach Cloudx™ offers centralized cloud consumption billing and performance reporting and provides managed, secure, high-performance WAN connectivity to the cloud and your business partner community. Cloudx offers direct interconnectivity with dedicated bandwidth to public cloud solutions offering IaaS, PaaS and SaaS (such as AWS, Azure and Google Cloud Platform and leading SaaS solutions) and enables you to centralize your WAN; delivering a powerful network fabric to bring you and your business communities closer to the cloud edge. Empowering you to deliver continuous value for your own customers.

Solving Enterprise Operational Complexity with Cloudx™

Today, your IT department is spending too much time and effort managing complex and disparate cloud provider solutions. What's more, you are probably struggling with the performance issues connecting through the public internet and the lack of operational transparency around solution performance and consumption.

TeraMach's Cloudx™ solves these issues by offering advanced connectivity, designed to create a flexible, high-performance, low latency network fabric and consolidated management of all cloud services; where cloud consumption, billing and reporting, performance and availability are monitored and managed transparently through the Cloudx platform.

TeraMach Cloudx™ Benefits

The TeraMach Cloudx™ solution enhances operational agility and performance and in addition consolidates the management and service delivery for all your cloud services, by:

1. Unifying your cloud usage across all providers through centralized billing and consumption reporting
2. Providing fully managed services for simple to complex hybrid cloud environments through an integrated operations management platform
3. Delivering advanced interconnection by providing direct and secure access to cloud providers everywhere.

TeraMach Cloudx™ Features

TeraMach's Cloudx™ delivers:

- Streamlined cloud consumption with consolidated billing and reporting
- Direct interconnection: High performance and dedicated network bandwidth to any cloud solution or platform (Hyperscale cloud providers and leading SaaS providers).
- Centralized WAN to bring you and your business communities closer to the cloud edge
- Unified IT Operations Management Platform
